

# How to engage with the One Basin CRC

At the One Basin CRC, we value active collaboration and engagement with our partners across all sectors to drive impactful research and innovation in the Murray-Darling Basin.

Whether you are new to the CRC or have been with us from the beginning, there are multiple ways to get involved and contribute to our shared vision of a resilient, productive, and sustainable basin.

## Ways to engage

### Participate in existing projects

Explore and join our active research projects across the basin. We encourage partners to engage with ongoing initiatives that align with their priorities. Visit [www.onebasin.com.au](http://www.onebasin.com.au) for detailed project briefs.

### Co-design new projects and research areas

Collaborate with us to shape the future of research. If you have ideas for new project areas or research needs, we invite you to work with us in co-designing innovative solutions. Contact us to discuss how we can bring your ideas to life.

### Join (or form) a 'partner action group'

Link up with other partners when you see an opportunity to solve a problem. The approval process is quick, and these groups can leverage support in the form of networks, in kind commitment, funding to meet face-to-face, and other resources.

### Stay updated and informed

We keep partners informed through a variety of mechanisms. Stay connected by subscribing to our newsletters and CEO updates, registering for project updates on individual project webpages, exploring our First Nations activities, and attending our regular online partner briefings.

### Join (or host) webinars

Participate in our webinars to stay up-to-date on the latest research and developments. Interested in sharing your expertise? You can also host a webinar and engage with our broader network.

### Follow us on LinkedIn

We post regular updates about key activities, events, changes and happenings. And please feel free to share our updates with others.

### Attend our annual event

Our annual event is a key opportunity for all partners to come together, share insights, and contribute to the future direction of the CRC. Mark your calendars for August each year and plan to participate in this important gathering.

### Support education and training initiatives

Play a role in building the next generation of leaders by supporting PhD hiring, hosting, internships, and leadership training. Your involvement helps equip future talent with the skills needed to tackle the Basin's challenges.

### Surveys

Your feedback helps shape the direction of our work and ensures we address partner needs.

### Connect with your local hub

Our four regional hubs in Loxton, Mildura, Griffith and Goondiwindi are fundamental to our commitment of place-based research. Reach out to your local hub manager (direct contact details can be found on our website) and help support locally-based research activity.

### Implement our work

With a growing body of completed projects, work with us to explore how you can apply the findings from our research.

## Our approach to program planning

At the One Basin CRC, our research and project planning are partner-driven. We actively seek your input to ensure our R&D agenda aligns with real-world needs.

### Here's how partners can shape our program:

**Collaborative co-design:** Partners are invited to participate in the co-design of projects, contributing ideas and expertise to shape high-impact research.

**Input through committees:** Partners can join project advisory committees (PACs) or regional advisory committees (RACs), helping guide the development and prioritisation of research initiatives or hub activity.

**Feedback and prioritisation:** We regularly consult with partners through surveys, briefings, and meetings, ensuring their input is reflected in the project activities.

To explore any of these engagement opportunities, or for more information, reach out to us at [admin@onebasin.com.au](mailto:admin@onebasin.com.au) and we'll point you in the right direction, or visit [www.onebasin.com.au](http://www.onebasin.com.au).
